HISTOPATHOLOGY REPORT

20386611

SA

Patient **ANDROS CHARALAMBOUS**

Test date 06/10/2021

Birthdate 1

Doctor **ANDROS CHARALAMBOUS**

Phone 25710333, FAX
25710300

Diagnosed 08/10/2021

SPECIMEN

Core biopsy right breast 1 o'clock breast for histology.

MACROSCOPY

The specimen consists of 5 cylindrical biopsies meas.0.4-0.7x0.2cm.

MICROSCOPY

Histological examination shws: invasive ductal carcinoma of the breast of no special type

Nottingham Histologic Score: Grade II (points 7)

Tubule/Glandular Formation: in <10% of the tumor (3 points)

Nuclear pleomorphism: Moderate (2 points)

Mitotic count 14-16/10HPF (2 points)

Lymphocytic and plasma cells inflammatory infiltrate.

There is lymphatic invasion.

No perineural or blood vessels invasion.

Ductal Carcinoma in Situ (DCIS) Yes

IMMUNOHISTOCHEMISTRY

Estrogen Receptors:

Positive (90% of the cells with nuclear immunoreactivity)

Intensity of stain: strong 60%,moderate 20%,weak 10%

H score 230

Progesterone Receptors:

Positive (90% of the cells with nuclear immunoreactivity)

Intensity of stain: strong 60%,moderate 20%,weak 10%

H score 230

HER2/neu : Negative (score 0)

Ki 67 : 32-34-24%

E-Cadherin : Positive

CONCLUSION

Pantopoulos
13/10 12:20
