PATIENT NAME:

I.D.: MALE, DOB:

GHS CODE:

DATE PERFORMED: 02/11/2022

REF PHYS: ANTONAKIS ANTONIOU, GHS CODE: D3610

HIO REF NO: 32332659

REF. ACTIVITY: 78306 - Bone and/or joint imaging; whole body

INDICATIONS / REFERRAL NOTES: ca prostate, PSA 36 ng/mL, Gleason Score 7

RADIOPHARMACEUTICAL USED: 20 mCi TC99m MDP

REPORT:

Tc99m-MDP Whole Body bone scan (78306, 99204, CY009):

There is irregular distribution of tracer uptake throughout the spine with focal areas of mildly increased tracer uptake involving the Rt sternoclavicular joint, the Lt side of the T8 vertebra, the anterior aspect of the Rt iliac bone, the Rt iliac crest and the S1 vertebra, Lt side. Degenerative knee and elbow changes.

Conclusion: MDP scintigraphy without definite findings of bone secondaries; however further imaging investigation is needed to elucidate the etiology of the pelvic findings. Clinical correlation.
